PROFESSIONAL SUMMARY

Innovative Frontend Developer with a proven ability to build responsive, user-friendly web applications from the ground up. Proficient in HTML, CSS, JavaScript, and modern component-based frameworks. Highly collaborative team player who excels in Agile environments, consistently delivering functional and elegant software solutions on time.

TECHNICAL SKILLS

- **Frontend:** HTML5, CSS3, JavaScript (ES6+)
- **Programming:** JavaScript, Python, C
- **Build Tools & Control:** Git, GitHub/GitLab
- **Other:** Web Design, Web Accessibility (WCAG), Figma (UI translation)

PROJECTS

BharatMart – E-Commerce Storefront Template

Technologies Used: HTML5, CSS3, Vanilla JavaScript (ES6+), Local Storage

- Developed a fully responsive, mobile-first e-commerce marketplace template using semantic HTML5, CSS3, and Vanilla JavaScript without relying on external frameworks.
- Engineered a dynamic shopping cart and wishlist system with real-time subtotal calculations, utilizing browser localStorage to persist user data across sessions.
- Implemented a persistent Dark/Light mode theme toggle using CSS custom properties (variables) and JavaScript.
- Designed engaging visual elements including a functional countdown timer for flash sales, a scrolling brands ticker, toast notifications, and scroll-reveal animations using CSS keyframes and Intersection Observer.
- Utilized modern CSS Grid and Flexbox to create complex, scalable layouts that adapt perfectly across desktop, tablet, and mobile devices.

RoadReady — Car & Bike Rental Platform

Technologies Used: HTML5, CSS3, Vanilla JavaScript

- A fully responsive frontend for a vehicle rental platform using pure HTML, CSS, and Vanilla JavaScript without external frameworks.
- An interactive vehicle catalog featuring real-time search and multi-criteria filtering (by vehicle type, brand, price range, and rating).
- A dynamic booking flow with live price calculations, instantly computing rental duration, security deposits, and GST based on user-selected dates.
- Client-side state utilizing browser local Storage to persist user data for wish lists, booking carts, and dark/light theme preferences across sessions.
- A modern, interactive UI utilizing CSS Grid/Flexbox, skeleton loading states, toast notifications, and scroll-reveal animations to enhance user experience.

Skyline Weather App

Technologies Used: HTML5, CSS Grid, Vanilla JavaScript, OpenWeatherMap API

- Developed a responsive Progressive Web App (PWA) for real-time weather forecasting, featuring a modern glass orphic interface.
- Integrated the OpenWeatherMap API using asynchronous JavaScript to fetch and display current conditions, 5-day forecasts, and Air Quality Index (AQI) data.
- Engineered dynamic, weather-reactive animated backgrounds that update automatically based on live conditions like rain, snow, storms, or clear skies.
- Implemented advanced browser capabilities, including the Web Speech API for voice search and the Geolocation API for automatic local weather detection.
- Visualized weekly temperature trends by integrating the Chart.js library for interactive data display.
- Utilized local storage to save user preferences, recent searches, and favourite cities for an optimized offline-friendly experience.

EDUCATION

- **Bachelor of Computer Applications (BCA)** | Amrapali Institute of Applied Sciences, Lamachaur, Haldwani | 2023 – 2026
- **Senior Secondary Education (Class XII)** | Arden Progressive School, Lamachaur, Haldwani | 2023
- **Secondary Education (Class X)** | Arden Progressive School, Lamachaur, Haldwani | 2021

LANGUAGES

English, Hindi

DECLARATION

I hereby declare that the above-mentioned details are true to the best of my knowledge and belief.
